

DATA SHARING AGREEMENT

BETWEEN

COPLASIMON (REQUESTING ORGANIZATION)

AND

(PROVIDING ORGANIZATION)

Purpose of Agreement

The purpose of the data sharing agreement between the Providing Organization and Requesting Organization aims at testing the models and the algorithms implemented for the innovations in the research project SerendiPV (H2020). Several tools are currently under development for the simulation and monitoring data analytics of innovative PV systems such as bifacial, floating and BIPV.

The Serendi-PV partners are actively looking for the monitored operational data of PV systems of different typologies and installed all over the world, in order to further develop and validate our simulation models.

The requesting Organization aims to validate the models on real-use cases of PV plants. The benefits for the data provider are multiple:

- If you possess such data, we would welcome collaboration. If your data are of interest for the research group involved in the PV modelling, you could receive in-depth analyses for free that will contribute to a better understanding of the performance of your PV assets.
- You could also receive a Quality Check and fault detection for these data.

The results of these data analyses, as well as the input data, will not be publicly released in order to preserve the critical commercial character of most of such data that will be provided by their owners, and to prevent their competitors from gaining access to the knowledge of the actual performance of their PV plants.

Duration of Agreement

This agreement will commence after the data will be judged as interesting by at least one of the partners. In case of several partners interested, a benchmark will be organized within the collaboration. Please also detail the length of the agreement, the proposed end is until termination by either party.

Description of Data

Describe the data being provided in this agreement. (Be specific – include variables names, descriptions, format, level of security/sensitivity.)

Data Access

The data will be physically transferred from the Providing Organization to the Requesting Organization using the CKAN database COPLASIMON <https://ckan.coplasimon.eu/>.

The data will be not publicly released but will be stored in dedicated private folders giving access to specific Serendi-PV partners mentioned in the finalized agreement.

Frequency: the information will be shared among the partners concerned. The information sharing can be terminated by either party on written notice. The terms of this agreement remain binding on any information shared and retained throughout its lifecycle, irrespective of whether the party remains a current signatory to this agreement.

Transfer: will occur by Mail and the data will then be stored on the CKAN database. Information will be shared on a strict need to know basis only and the data will only be processed by staff in order for them to perform their duties in accordance with one or more of the defined purposes.

Under no circumstances should personal data be processed in any way that is unsecure or left unattended. It is the responsibility of the sender to ensure that the method is secure and that they have the correct contact details for the receiver.

Data Security

The data will be stored on the CKAN database. The security measures can be check on the [dedicated page](#).

Termination (of Agreement)

The agreement can be terminated by writing, with a length of one week notice before termination. After the termination the data will be deleted on the CKAN database.

Payment

No payment is due by both parties for this agreement.
